

SMOG CHECK TRAINING DEVELOPMENT

Submit this application WITH YOUR CURRENT RESUME to the "Standards and Training Unit" address listed above.

Smog Check training development may require specific expertise in different areas relating to Smog Check inspections and repairs. If you consider yourself an expert in areas relating to Smog Check inspection and repair please list those areas along with any documentation you feel would substantiate those qualifications. If you are involved as an educator in the automotive industry, please list those qualifications as well.

Note: Completion and submittal of this application does not commit you to Smog Check training development, nor does it guarantee your participation. Participants will be selected and notified.

STATE OF CALIFORNIA
SUBJECT MATTER EXPERT INSTRUCTOR APPLICATION
BARS&T(REV. 2/11)

Please indicate your area of expertise:

___ Emission control diagnosis & repair

___ Education / Teaching

___ General automotive diagnosis & repair

___ Other (please explain)

Please list all other accreditations, certifications and licenses you currently hold:

Please state the reason you wish to participate as an SME:

I declare under penalty of perjury that all information provided on this application is true and correct. I understand that if I am invited to participate as an SME I will be required to comply with the terms of a security/confidentiality agreement. I also understand that participation as a "subject matter expert" for the Department of Consumer Affairs / Bureau of Automotive Repair (BAR) is an "at will" position, meaning BAR can terminate my participation at any time without notice and without cause.

Subject Matter Expert Role In Training

- Select committees or groups of education and industry experts will work with BAR to identify and develop training outlines and standards for Engine and Emission Control Fundamentals Training and ASE Alternative / Equivalency Training. *(Schools will select or establish training curriculum based on the outlines and standards).*
- SMEs will make other recommendations to BAR with respect to Smog Check Training.
- The selection process will likely result in two groups of approximately 6 members each. Group leads may be chosen, depending on the work needed.
- SMEs will be selected from varied institutions and backgrounds- vocational schools, colleges- private and public, smog check stations, and repair shops.
- Staggered terms will help ensure consistency and fresh perspectives.
- SMEs will work together and independently in development of the training standards, as necessary.
- SMEs will be paid for their services.
- BAR will establish guidelines to ensure the standards are consistent with national automotive repair practices and reflect the job tasks of a Smog Check Inspector or Smog Check Repair Technician, as applicable.
